Summer	Weather SCI GEO (Summer)	Water SCI GEO (Summer)	Growing things SCI GEO (Summer)	Animals SCI GEO (Summer)

Topics will typically last a term with their secondary topics (seasons and specific Christian celebrations) taught alongside or discreetly as a separate topic.

Teachers may wish to only run a topic for half a term, in this instance they will continue with the next topic on their programme list or choose to follow the interests of the children in their class to create a new topic. All such changes to the rolling programme are made in discussion with the head of teaching and learning to ensure coverage is maintained.

Foundation subject links - All topics have strong links to literacy and numeracy learning. Other subjects are marked as below. Please note all topics will fully cover all subjects the marked subjects show those with the strongest link to the topic.

SCI=Science **RE**=Religious Education **GEO**=Geography **HIS**=History

The fourth topic in italics is for anyone who wishes to cover 4 topics a year without starting the following year's programme.
